

CRYPT KILLER™

OPERATOR'S MANUAL

TECHNICAL SERVICE: (847) 215-5100 (EXT. 122, 123)

CRYPT KILLER IS A TRADEMARK OF KONAMI (AMERICA) INC. KONAMI IS A REGISTERED TRADEMARK OF KONAMI CO., LTD.

© 1995 KONAMI (AMERICA) INC. ALL RIGHTS RESERVED.

PART NUMBER: 420400

PRINTED IN THE U.S.A.

Precautions

This manual contains detailed information concerning the use of "Crypt Killer," an original product of KONAMI, Ltd. Be sure to read through the manual completely before attempting to use this product.

- ◆ Unauthorized reproduction of this document or any of its contents is strictly forbidden. We reserve the right to revise equipment specifications or contents of the software without prior notice.
- ◆ The contents of this game, its main data and design are protected by copyright law.
- ◆ For best results, get a good understanding of the information contained in this manual in order to use the product properly.

Safety Precautions

Please observe the following suggestions in order to ensure your safety when using this product. Be sure to read and get a good understanding of the following items:

DANGER!

Indicates a situation where disregarding instructions could result in death or serious injury.

CAUTION!

Indicates a situation where disregarding instructions could result in injury or product damage.

Setting up the Game

DANGER!

This product should not be set up, moved or transported by anyone other than qualified personnel.

- ◆ When setting up, be sure to fasten the machine securely with the four level adjusters. If the unit is not fastened securely, an injury could result or the game could be damaged.

- ♦ When moving, lift the leg adjuster all the way up. If not, the adjuster and/or the game machine mounting sections could be damaged.

This product is an indoor game machine. Under no circumstances should the game be set up outside.

- ♦ Setting the game up outside could result in injury and/or equipment damage.

Do not set up the game machine near emergency exits.

- ♦ Doing so could block exits in time of emergency and could result in death or serious injury.

Do not set up the game machine:

- ♦ In a place exposed to rain or moisture.
- ♦ In a place exposed to direct sunlight.
- ♦ In a place exposed to direct heat from a heater, etc.
- ♦ Near hazardous substances.
- ♦ On an incline or uneven floor.
- ♦ Near fire extinguishing equipment.
- ♦ In a place exposed to strong vibration.
- ♦ In a place exposed to excessive dust.

Do not place heavy objects on the game machine or place containers holding chemicals or water near the game machine.

- ♦ Electrical shock or damage could be caused by spilled liquid.

Do not place objects near the ventilation holes.

- ♦ Doing so could cause internal temperature to rise excessively, resulting in equipment failure.

Do not place heavy objects on the power cord.

- ♦ Doing so could damage the cord and result in fire or injury.

Never unplug the game by pulling on the power cord; unplug from the plug itself.

- ♦ Doing so could damage the cord, and could result in fire or electrical shock.

CAUTION!

Be sure to use indoor wiring rated for single-phase, 110VAC, 20A or more. For extension cords, use wiring rated for 20A or more.

- ♦ Using cords outside this specification could result in fire or electrical shock.

Be sure to ground the game from the ground terminal on the power cord.

- ♦ Failure to do so could result in fire or electrical shock.

Do not plug or unplug the power cord with wet hands or while standing on a wet surface.

- ♦ Doing so could result result in electrical shock.

Operation

DANGER!

If a problem with the equipment occurs, immediately turn off the power, unplug the power cord from the receptacle, and contact qualified service personnel.

- ♦ Continuing to use the equipment without fixing the problem could result in fire or electrical shock.

Do not place objects on the top of the game.

- ♦ Doing so could damage the cabinet or the objects could fall off and result in injury.

Inspection and Cleaning

DANGER!

Be sure to unplug the power cord from the receptacle before inspection or cleaning.

- ♦ The possibility of electrical shock exists as long as the power cord is not unplugged.

Be sure to use parts subject to wear in accordance with specifications.

- ♦ Not doing so could result in fire or equipment failure.

Moving and Transportation

CAUTION!

The game machine contains parts such as a projection television (deluxe cabinet) and a HDD (hard disk drive) which are sensitive to vibration and impact. You should therefore be very careful when moving or transporting the machine.

The game PCB uses precision components. Be very careful when handling or or transporting the PCB.

- ♦ Rough handling could result in component failure.

When transporting the machine, release the level adjusters.

- ♦ Not releasing the level adjusters could result in equipment damage or injury.

Game Options and Utilities

Self-Test

When the power is turned on, an operation check of the board is automatically carried out, and the results are displayed on the screen.

Normal: "OK" is displayed and then the game will start.

Abnormal: "BAD" is displayed and the check is then repeated. If "25N BAD" is displayed, turn off the power, and while pushing the test switch on the board or service plate, turn the power back on. Continue to hold the test switch until "RELEASE TEST SW" appears on the screen.

* If you turn the power on while pushing the test switch, all settings made in the manual test mode revert to the factory settings.

Manual Test

1. Starting

After switching on the power, press the test switch on the PCB or the one in the cabinet. The game then enters the test mode and the main menu is displayed.

NOTE: If you hold the test switch while turning the power on, the settings in the EEPROM will revert back to the factory settings.

2. Selecting Menu Items

Select items with the player start buttons (1P button moves the selection up, 2P button moves the selection down), pull the gun trigger and the test will begin.

3. Quitting

Select "GAME MODE" from the main menu and pull the gun trigger. The game will then return to game mode.

4. Saving Data After Adjustment

After changing the settings for the selected items, select "SAVE AND EXIT," and pull the trigger. The data is then saved and the main menu appears. Factory settings are displayed in green, and altered settings are displayed in red.

* After changing a setting, if you select "EXIT" instead of "SAVE AND EXIT," the game will display "YOU DID NOT SAVE, DO YOU WANT TO SAVE?" If you select "YES," "NOW SAVING" will appear. If you select "NO," "NO MODIFICATION" appears and the changed data is not saved.

Explanation of Menu Items

MAIN MENU

I/O CHECK.....	Control switch check
SCREEN / GUN CHECK.....	Monitor test screen and gun test
COLOR CHECK.....	Color adjustment test screen
MEMORY CHECK.....	Memory diagnostics
DIP SWITCH SETTINGS.....	Display of DIP switch settings
SOUND OPTIONS.....	Sound check and settings
GAME OPTIONS.....	Game settings
COIN OPTIONS.....	Coin settings
GAME MODE.....	Return to game mode

1 PLYR START=UP/2PLYR START DOWN
GUN TRIGGER=DO CHECK

1. I/O Check

"ON" is displayed when control switches are turned on. To return to the main menu, push the 1P and 2P start buttons simultaneously.

I/O CHECK

	PLAYER1	PLAYER2	PLAYER3
START	OFF	OFF	OFF.....
TRIGGER	OFF	OFF	OFF
RELOAD	OFF	OFF	OFF

"ON" is displayed as each switch is turned on.

LAMP	OFF	OFF	OFF.....
------	-----	-----	----------

Automatically flashes each start lamp.

SERVICE SWITCH 1	OFF
SERVICE SWITCH 2	OFF (UNUSED)
COIN MECH SWITCH 1	OFF
COIN MECH SWITCH 2	OFF (UNUSED)

1 PLYR AND 2PLYR START=EXIT

2. Screen / Gun Check

Screen focus, distortion and size are adjusted and gun operation is checked using a grid on this screen. Check whether the entire display can be hit with the P1, P2, and P3 guns. A bullet mark of the player's color remains at spots where the bullet hits. Push the 1P start button to end the test and return to the main menu.

A bullet mark of the player's color remains at spots where the bullet hits.

Screen adjustments are made by using the grid.

3. Color Check

Adjust screen brightness so that the specified part of the color bar becomes colorless. Each time you push the 2P start button, the entire screen turns red, blue and white in the sequence of the color bar.

4. Memory Check

Checks each memory IC in sequence and displays "OK" or "BAD."

5. DIP Switch Settings

Displays the DIP switch settings. Switching the corresponding DIP switch on the main PCB will alter these settings.

DIP SWITCH SETTINGS
